Biography

Formed in 2025, Seven Circles was born out of a desire to treat extreme metal as a physical space rather than just a genre. Delivering a wall of high-gain devastation, blending the rhythmic stomp of modern groove metal with the technical precision of the modern era, the band has cultivated a sound .defined by low-tuned devastation and immersive, cinematic atmosphere

Following the philosophy of their name—abstract, ancient, and cyclical—the band's music avoids traditional tropes in favor of a "Wall of Sound" approach. Massive, high-gain distortion and mechanical grooves are layered with soaring melodic textures and intense, commanding vocals. The result is a ..specialized brand of extreme metal built for the modern age
